

Outdoor Optical All Dielectric Self Support (ADSS)

Applications

- Outdoor cable
- Suitable for all type of aerial lines
- Suitable for high, medium and low voltage transmission system
- Railways and telecommunications pole route installation

Features

- All dielectric and self-supporting construction
- Single-Layer, Stranded construction Up to 144 Fibers
- Nonmetallic construction
- Low weight, Dry and clean construction without filling jelly
- High modulus aramid yarns provide high tensile strength and long reliability
- Black anti track jacket that is resistant against high voltage fields

Options

- Available with special Design according to the costumer Request
- Delivery length is as customer request
- Other color coding is available according to the costumer Request
