

HNS-010/E

Handset

HNS-010/E is a military strengthened handset designed and manufactured for military operations along with various voice transceiver equipment e.g. radio communication systems. Low weight and capability of operating in different weather conditions are some advantages of the handset.

Microphone Specifications

Impedance.....	150Ω ± 30Ω
Frequency response.....	500Hz ~ 5KHz
Microphone type.....	dynamic
Sensitivity.....	-64 ± 3 dB (1V/Pa@1KHz)

Earphone Specifications

Impedance.....	300Ω ± 30Ω
Frequency response.....	500Hz ~ 7KHz
S.P.L output.....	111 ± 3 dB @ 1KHz

Physical & Environmental Specifications

Weight.....	355gr
Operating temperature.....	-20°C ~ +60°C
Sealing.....	rain test
Resisted against.....	shock, corrosion, and humidity
Environmental standard.....	MIL-STD-810F
